

GIS Help Page

Layers/Legend

Toggles between the list of layers contained in the interactive map and a legend of all the visible layers.

Overview Map

Allows you to turn the Overview Map Off and On

Zoom In

Allows you to zoom in to an area of interest by clicking a point or by dragging a box. To drag a box one must click and hold the mouse button, and release only after the area of interest is encompassed by the red rectangle that appears on the screen

Zoom Out

Allows you to zoom out from an area of interest by clicking a point or by dragging a box. To drag a box one must click and hold the mouse button, and release after a red rectangle appears on the screen. The smaller the rectangle/window the farther out you will zoom

Zoom Full Extent

Allows you to zoom to the full extent of the map

Pan

Allows you to move around the map while maintaining the same zoom level

Information

Allows you to view additional information for a feature contained in the map*. First select the "Information" button and then click on a Point of Interest in the map. A new page will pop-up showing additional information or will link you to a website.

Print

Allows you to print the current view on your screen, along with a title, overview map and a legend.

* You must allow pop-up's from this site for this feature to work properly. Additional information is available for the layers contained under the "Points of Interest" Folder/Group
